

# WE GIVE SHAPE TO YOUR IDEAS

PROCESSING OF PLASTIC MATERIALS FOR BLOW-MOULDING,  
MOULDING AND STRETCH-BLOW MOULDING.

In addition to our standard range of products, we can create a series of articles – **to our in-house design or to the customer’s design** – ranging from bottles, jars and containers of various sizes and shapes, to technical articles for the technical and industrial sectors, for gardening, window dressing, furniture, hobbies, toys and much more.

We are able to **manufacture using different techniques, from moulding to blow-moulding to stretch-blow moulding** and we offer an efficient and complete service from the quotation to the creation of the moulds to their testing until obtaining the finished product.

# Over 40 YEARS OF EXPERIENCE at your disposal.

## SUSTAINABILITY, RESPECT AND RESEARCH

The founders Battista Schiavo and Marino Faccin have managed, with their Team, a continuously evolving business for over forty years. Our goals include those common to everyone with regard to respecting the environment that surrounds us. In fact, the production cycle also uses plastics obtained from renewable sources, along with post-consumption materials. Our awareness of the importance of sustainability in today's world can also be seen at our headquarters, where clean energy is used which is obtained from renewable sources produced by our photovoltaic system.

## IN-HOUSE PRODUCTION CYCLE

Equipped with systems and machines that are continuously renewed in line with technological evolution, we are able to provide our customers with an efficient and complete service, from the quotation to the design, from the creation of the moulds to their testing, and going so far as the finished product. The company offers customers the opportunity to customise their products with screen printing, as it has a screen printing and labelling department boasting cutting-edge equipment and specialist technical personnel. The finishing department deals with assembly and packaging strictly in line with the specifications provided by the customer.

## Research, quality, certification and sustainability.

STP produces a wide range of plastics bottles, jars and cans for the entire food industry. Upon request, we work with HDPE, R-PE, SINGLE-STAGE PET, R-PET, PETG, PPET, GREEN PE, LDPE. **All containers are compliant with the regulations in force for the relevant industry.** We customise everything: closure, colour, shape, design, quantity... We can meet all your needs thanks to a broad choice of sizes, capacities and shapes depending on the intended use.

# APPLICATION SECTORS

## FOOD

Wide range of plastic bottles, jars and cans for the entire food industry. The materials used for the plastic containers are:

**PET** = polyethylene terephthalate, usually disposable, transparent, for liquid and solid cold substances. Specifically recommended for food contact, this thermoplastic resin is part of the polyester family. 100% RECYCLABLE as it does not lose its fundamental properties during the recovery phase, meaning it can be transformed repeatedly.

**HDPE** = low and high density polyethylene, reusable, full colour, durable and safe for liquid and solid substances.

- Containers compliant with the regulations in force for the food industry.
- Possibility of customisation, such as the closure.
- Broad choice of sizes, capacities and shapes.

## COSMETICS

Design solutions to meet the needs of those who enjoy taking care of themselves. Wide range of plastic bottles, jars and cans for the entire cosmetics industry. The materials used for the plastic containers are:

**PET** = polyethylene terephthalate, usually disposable, transparent, for liquid, creamy and solid substances, this thermoplastic resin is part of the polyester family. 100% RECYCLABLE as it does not lose its fundamental properties during the recovery phase, meaning it can be transformed repeatedly.

**HDPE** = low and high density polyethylene, reusable, full colour, durable and safe for liquid and solid substances.

- Containers compliant with the regulations in force for the cosmetics industry.
- Possibility of customisation, such as the closure.
- Broad choice of sizes, capacities and shapes.

## CHEMICAL

Robust, safe and certified solutions, ideal for this industry. Wide range of plastic bottles, jars and cans for the entire chemical industry. The materials used for the plastic containers are:

**PET** = polyethylene terephthalate, usually disposable, transparent, for **liquid and solid substances**, this thermoplastic resin is part of the polyester family. 100% RECYCLABLE as it does not lose its fundamental properties during the recovery phase, meaning it can be transformed repeatedly.

**HDPE** = low and high density polyethylene, reusable, full colour, durable and safe for liquid and solid substances.

- Containers compliant with the regulations in force for the chemical industry.
- Possibility of customisation, such as the closure.
- Broad choice of sizes, capacities and shapes.

# THE IMPORTANCE OF CHOICE

The correct container forms the basis of a strategic choice. The parameters for identifying the correct product are: content, place of use, transportation method, relevant industry and target consumer.

**Bottles**

**Jars**

**Cans**

# BOTTLES

Ideal for the food, cosmetic, chemical and detergent industry. Offered in HDPE or PET but can be made from all other plastic materials. Circular, rectangular or elliptical shape. With and without hand hole, ergonomic and with notches on the side.

MATERIAL	HDPE
NECK	-

CLOSURE: 2011576

### ST70Q

CAPACITY	5000 ml
SECTION	Rectangular
BASE	184x136 mm
HEIGHT (excluding cap)	284 mm
CLOSURE TYPE	Seal, without Seal
MATERIAL	HDPE
NECK	-

CLOSURE: STTP05B/STTP05A/2011702/2011701/201142

### ST91G

CAPACITY	5000 ml
SECTION	Rectangular
BASE	188x120 mm
HEIGHT (excluding cap)	318 mm
CLOSURE TYPE	Seal, without Seal
MATERIAL	HDPE
NECK	-

CLOSURE: STTP05B/STTP05A/2011702/2011701/201142

### ST84A

CAPACITY	5000 ml
SECTION	Rectangular
BASE	196x127 mm
HEIGHT (excluding cap)	288 mm
CLOSURE TYPE	Seal, without Seal
MATERIAL	HDPE
NECK	-

CLOSURE: STTP05B/STTP05A/2011702/2011701/201142

### ST113A

CAPACITY	5000 ml
SECTION	Rectangular
BASE	130x186 mm
HEIGHT (excluding cap)	283 mm
CLOSURE TYPE	Seal, without Seal
MATERIAL	HDPE
NECK	-

CLOSURE: STTP05B/STTP05A/2011702/2011701/201142

### ST84D

CAPACITY	5000 ml
SECTION	Rectangular
BASE	196x127 mm
HEIGHT (excluding cap)	288 mm
CLOSURE TYPE	Spray, Seal, Child-resistant, without Seal
MATERIAL	HDPE
NECK	-

CLOSURE: 201143SS/201143SG/201143P/201143

### ST91A

CAPACITY	5000 ml
SECTION	Rectangular
BASE	188x120 mm
HEIGHT (excluding cap)	318 mm
CLOSURE TYPE	Seal, without Seal
MATERIAL	HDPE

CLOSURE: STTP05B/STTP05A/2011702/2011701/201142

### ST91H

CAPACITY	5000 ml
SECTION	Rectangular
BASE	188x120 mm
HEIGHT (excluding cap)	314 mm
CLOSURE TYPE	With locking ring
MATERIAL	HDPE
NECK	-

CLOSURE: 2012526

# CLOSURES

Wide range of bottle caps available in customised colours in spray, seal, dispenser, push cap, child-resistant and drip-proof versions.

## 20100250

NECK	-
DESCRIPTION	Screw cap with child resistant closure

## 20101

NECK	28/410
DESCRIPTION	Conic push-pull screw cap

## 201022

NECK	-
DESCRIPTION	Screw cap

## 201023

NECK	-
DESCRIPTION	Push-on cap with spray nozzle and cap

## 201023SB

NECK	-
DESCRIPTION	Pressure child protector with spray nozzle and cap

## 201027B

NECK	28/400 step 4
DESCRIPTION	Screw cap

## 201030B

NECK	28/410
DESCRIPTION	Screw cap with spray nozzle and cap

## 201032

NECK	-
DESCRIPTION	Detergent/softener cap

## 201043ST

NECK	-
DESCRIPTION	Screw cap with Child-resistant and pressure undercap with spray hole

## 201051

NECK	-
DESCRIPTION	Child-resistant cap

## 201055S

NECK	55,4 h.71
DESCRIPTION	Non-drip screw cap

## 201113

NECK	28/410
DESCRIPTION	Screw cap with spray nozzle and cap

**201130**

NECK	-
DESCRIPTION	Screw cap with spray nozzle and cap

**201132**

NECK	28/410
DESCRIPTION	Screw cap

**201132M**

NECK	28/410
DESCRIPTION	Screw cap with spray nozzle and cap

**201140**

NECK	-
DESCRIPTION	Detergent/softener cap

**201142**

NECK	38
DESCRIPTION	Conical screw cap with guarantee seal

**201143**

NECK	28/410
DESCRIPTION	Conical screw cap with guarantee seal

**201143P**

NECK	28/410
DESCRIPTION	Screw cap with seal and gasket

**201143SG**

NECK	28/410
DESCRIPTION	Child-safe screw cap with gasket and guarantee seal

**201143SS**

NECK	28/410
DESCRIPTION	Screw cap with baby safety and pressure undercap with spray hole

**201144**

NECK	-
DESCRIPTION	Conical screw cap with guarantee seal

**2011565**

NECK	-
DESCRIPTION	Screw cap with seal

**2011572**

NECK	-
DESCRIPTION	Screw cap with seal

**2011576**

NECK	38
DESCRIPTION	Screw cap with seal, teat Ø 30,3 mm

**2011577**

NECK	56
DESCRIPTION	Screw cap with seal, teat Ø 46 mm

**2011579**

NECK	-
DESCRIPTION	Screw cap, teat Ø 17,3 mm

**2011584**

NECK	28/410
DESCRIPTION	Screw cap with seal and tablet

**2011585**

NECK	28/410
DESCRIPTION	Screw cap with seal, teat Ø 26,4 mm

**2011701**

NECK	38
DESCRIPTION	Screw cap with seal

**2011702**

NECK	38
DESCRIPTION	Screw cap with seal and vent

**2011703**

NECK	-
DESCRIPTION	Conic screw cap with seal

**20120**

DESCRIPTION	Screw cap with seal

# TECHNICAL

STP produces a wide range of specially designed technical articles. We can satisfy the requirements of many industries: we give you just a few examples on this page.

## AGRICULTURE

Components for the Agriculture sector such as Hoppers, Backpack pumps, Pressure pumps, Suction pump manifolds, Tanks, and many other parts made to the customer's design.

## LIVESTOCK

Components for the Livestock sector such as Drinking troughs, Container bins of various capacities, Pigeon bell siphons, Feed tanks, Hoppers and many other parts made to the customer's design.

## AUTOMOTIVE

Components for the Automotive industry created with blow moulding and injection moulding techniques in many types of plastic materials such as Child seats, Fuel tanks, Water tanks, Air conductors and many other parts made to the customer's design.

## DESIGN

Design products created to the customer's design such as Door stops, Watering cans, Toys and iconic ornaments, in many different colours.

## GARDENING

Gardening products created to the customer's design and in a broad range of colours such as Watering cans, Backpack pumps, Pressure pumps and finished product components.

## HOBBIES

Products for Hobbies created to the customer's design and in a broad range of colours such as Water bottles, Sprayers, Fermenters, Watering cans, Backpack pumps, Pressure pumps and components for finished products.

### LUBRICANTS

Products for Lubricants such as Cans for transport, single-dose bottles and dispensers.

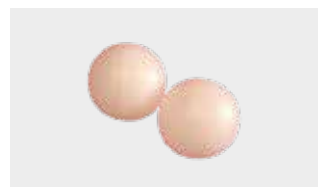

### SCREEN PRINTING

The Company offers the possibility of customising the containers with a Screen Printing, to meet the demands of the customer and to customise the finished products up to their packaging and storage.

### MEDICAL

Products for the Medical industry such as Bellows of various capacities, Bottles and Containers of different shapes and capacities.

### TECHNICAL INDUSTRIAL

Components for the Technical Industrial sector with the plastic materials blow moulding technique such as Collection tanks, Trays, Pressure washer handles, Floating balls for tanks, Bellows / Ducts and many other parts made to the customer's design.

### ROAD SIGNS

Components for Road Signs such as fillable base, Signal container and base and various accessories made to the customer's design.

### WINDOW DRESSING

Products for Window Dressing such as Men/Women Legs, Men/Women Busts and various accessories created to the customer's design and a wide range of colours.

# CERTIFICATIONS

## ISO 9001

We have been ISO 9001 certified for over twenty years, the primary pursuit of which is to satisfy our customers in relation to the products and services supplied, as well as to improve the business performances on a continuous basis, enabling our company to maintain and improve over time the quality of its goods and services for our customers. The ISO 9001 certified quality management system is a strategic tool, also often required by public tenders, but also by various sectors such as automotive, technical, cosmetic, food and many others.

## Plastica seconda vita

We are Plastica Seconda Vita Certified which guarantees the production with regenerated plastic from differentiated waste collection, from industrial waste and from MixEco according to the concept of the "traceability" of recycled materials, calculating their content as envisaged by the UNI EN ISO 14021 standard.

All certified bottles may also, upon request, bear the "Plastica Seconda Vita" logo to identify them. This makes them more easily identifiable as products that can also be used by Public Administrations and/or companies with predominantly public capital, as well as the large-scale retail trade industry and private citizens.

The Plastica Seconda Vita brand promotes and communicates the recycling of the polymers used, also to highlight the huge potential of regenerated plastic materials in the achievement of a circular economy.

**All products can be viewed at the following link:** <https://www.ippr.it/aziende-associate/stp-srl/>

## PRS Green label

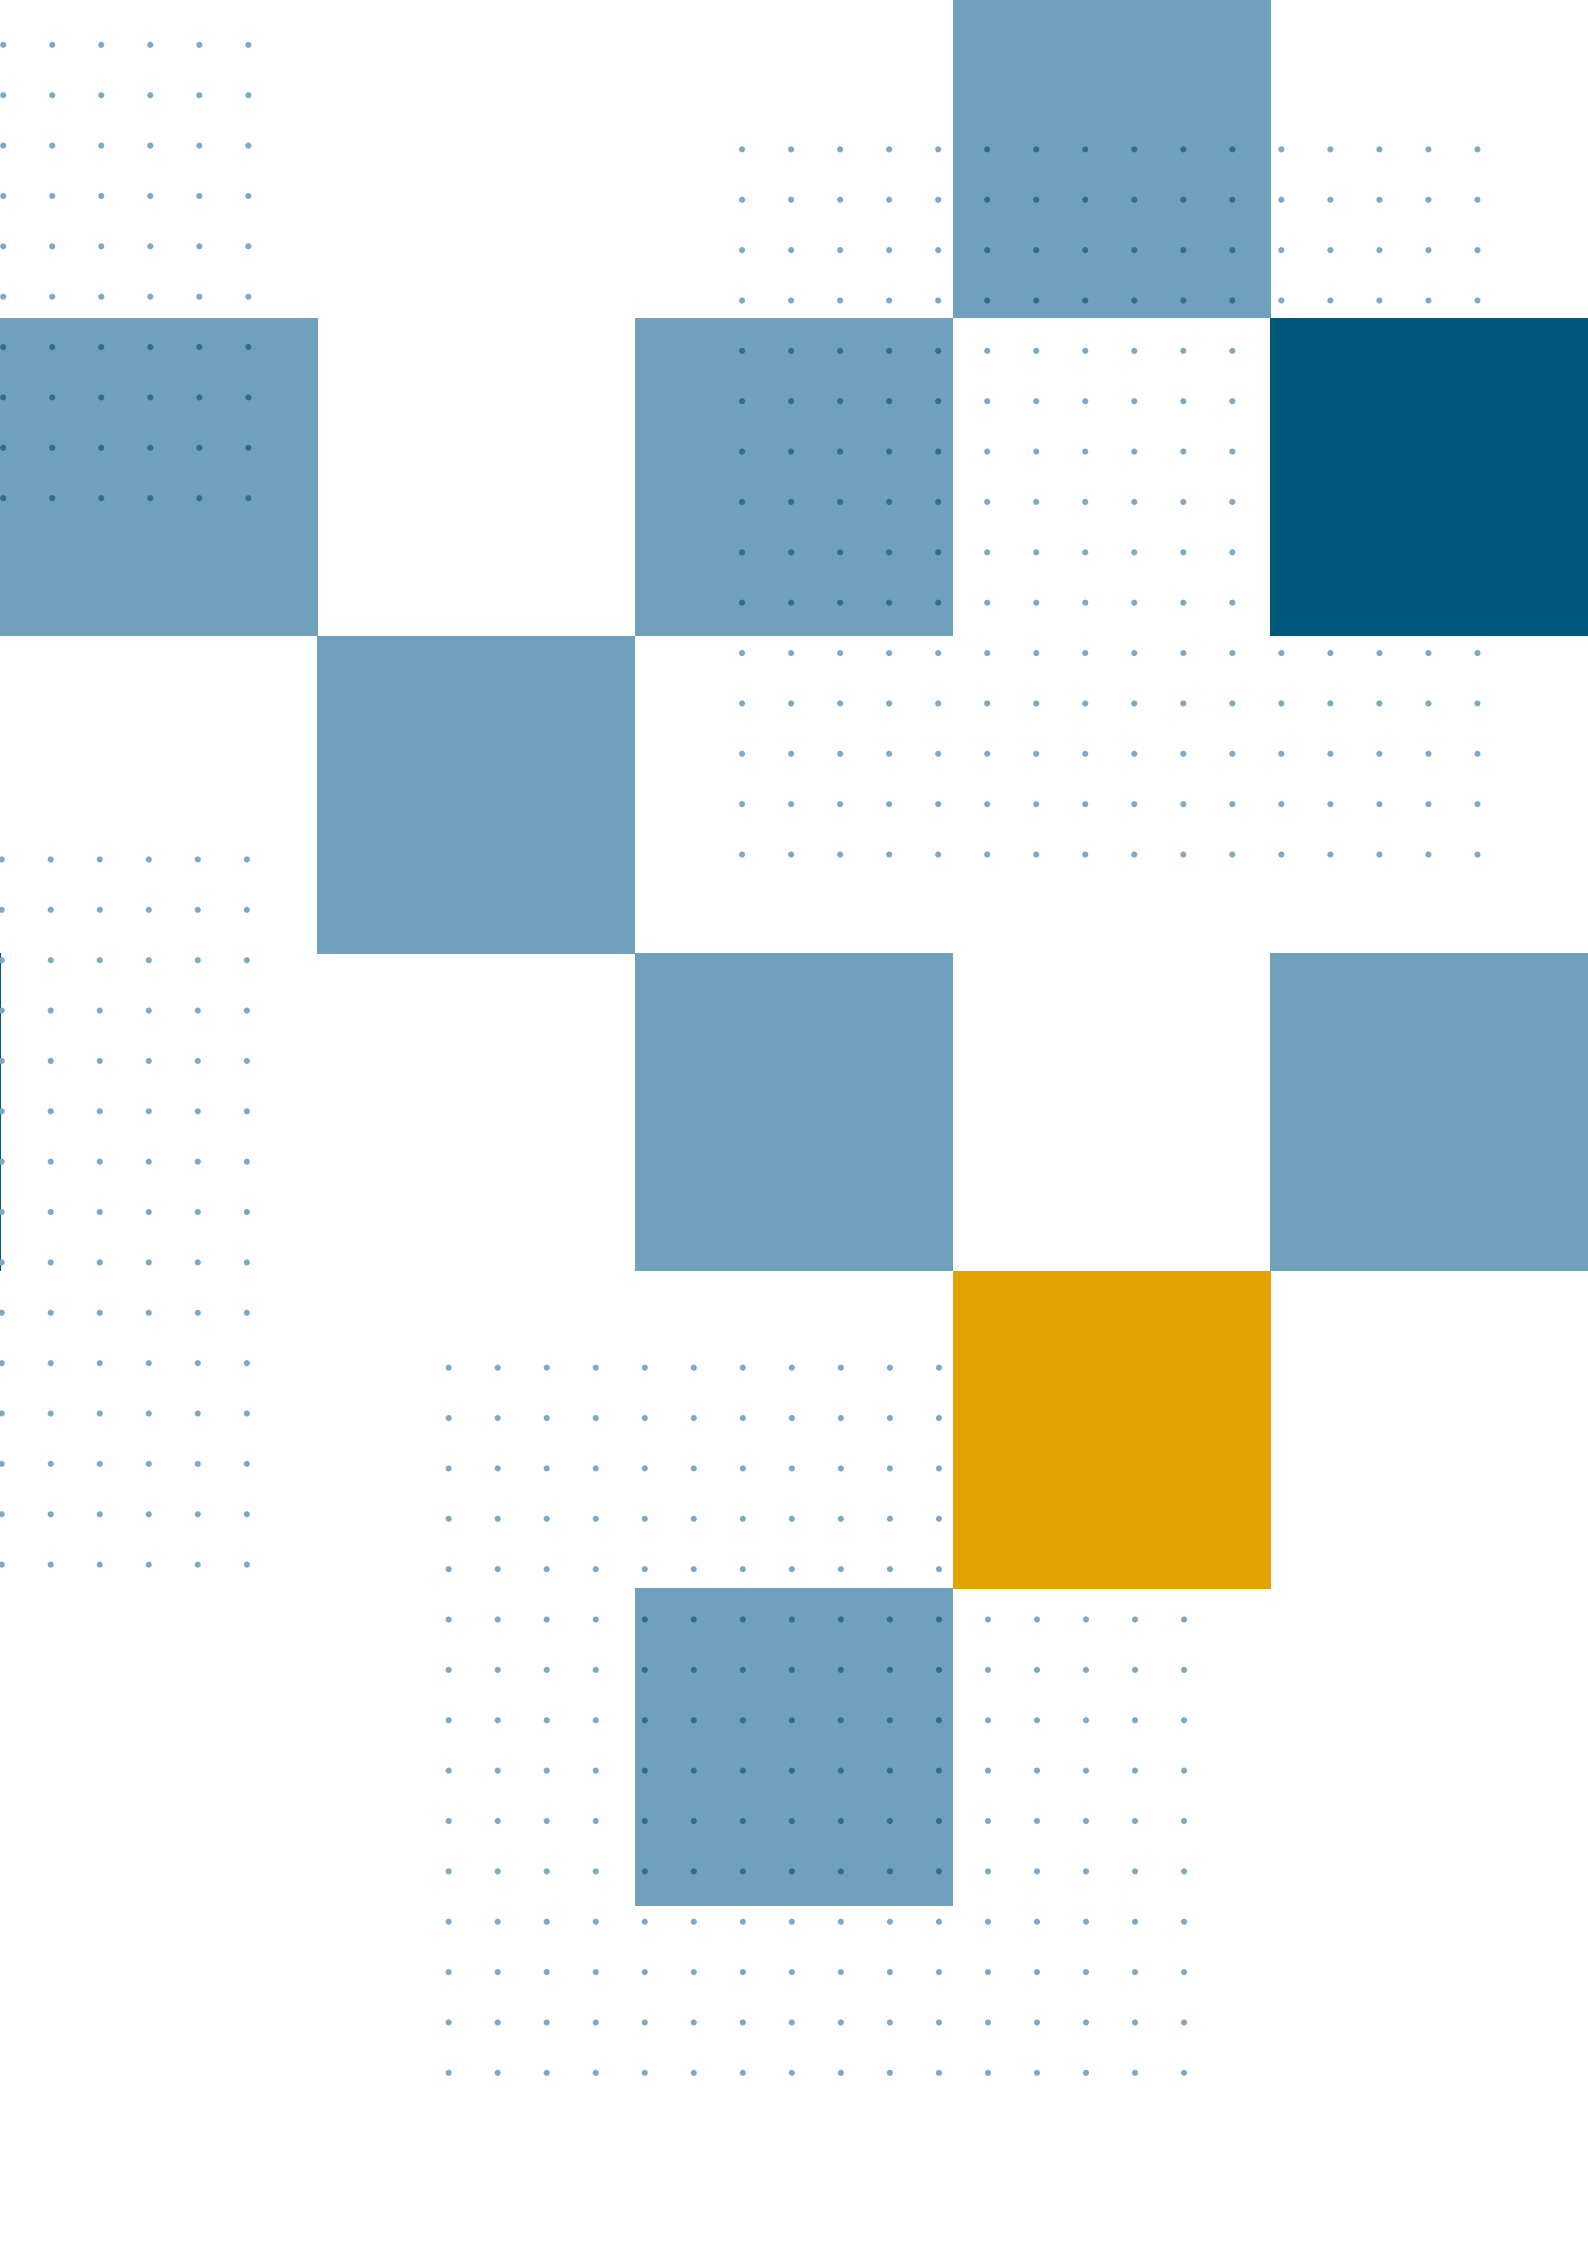

We have obtained the PRS Green Label with our personal certificate as a partner which actively contributes to their circular pallet reuse system.

Thanks to us, the recovery of their pallets can be maximised and they can be reused as often as possible.

With PRS Green Label, we form part of a sustainable network with green polymer manufacturers, plastics processors, carriers, depots, merchants and distributors.

Each entity plays its own part with a view to ensuring that the pallet reuse system functions, contributing together to a better environment.
